A. B. C. CODE—4th and 5th Editions and Western Union Code Used

NEW YORK, *July, 1905.*

HE yearly increase of the number of our customers, whom we thank for their past favors and their recommendations, is the best proof that we do the best in our ability to satisfy them.

## PRICES ARE FREE EX. CARS NEW YORK, DUTY INCLUDED

**Terms,** 50 per cent net cash on delivery, balance against three months' draft, or 2½ per cent discount on balance for cash within ten days. Orders from unknown customers accepted only when accompanied by cash for half the amount of order, or satisfactory reference.

**Orders** accepted subject to crop, and provided stock is unsold in Japan. It is understood, however, that we resume no responsibility for accidents or delays beyond our control.

**Claims** for errors and deficiencies must be made within ten days after delivery of goods. In case of any error on our part, it is mutually agreed between the purchaser and ourselves that we shall not, at any time, be held responsible for a greater amount than the original price of invoice.

**San José Scale.** All of our nursery stock is thoroughly fumigated in our own fumigator, which was built according to instructions received from Mr. Craw, State Entomologist of California.

## Novelties

**ARALIA CORDATA** (Japanese Udo). A new winter salad. A perennial plant of the order of Araliaceæ, growing wild in hilly regions, also extensively cultivated in farm lands. Its young and tender stalks are eaten as a vegetable in Japan. There are two varieties of Udo, called respectively Moyashi- or malt-Udo and Kan- or winter-Udo. These, though of similar appearance, are quite differently cultivated. The growing of these forms an important part of market-gardening; this plant also, when fully grown, forms a splendid ornamental plant 5 to 6 feet high, with large compound leaves in bush form.

	Per 100 roots
Aralia Cordata (Kan-Udo).....	\$10 00
" " (Moyashi-Udo).....	8 00

**EUTREMA WASABI** (Japanese Horse-Radish). There is a fresh sharpness about Japanese Wasabi that not even the finest Austrian sorts of horse-radish possess. The color, too, is not generally white, but a delicate shade of green, and, although served in much the same way that horse-radish is served in America, it is quite a different thing. The roots, which are grated to prepare this appetizer, are produced by a plant of the same family as the true horse-radish. Per 100 roots, \$10.

Mr. D. G. Fairchild, the agricultural explorer of U. S. Dept. of Agriculture, amongst "finds" in his recent tour in Japan, introduces these plants to the western public's attention, and full descriptions are given in Bulletin No. 42 of that Department.

## BAMBOO STICKS

6 ft. long (2,000 in bundle), \$5 per 1,000; 4 ft. long, \$3.50 per 1,000.

Fern Balls

(*Davallia bullata*)

Decidedly one of the most striking and best paying novelties of recent years; of easy growth, not requiring much care, and occupying none of the space in the greenhouses required for other plants, being suspended from the rafters. In the fall the leaves die off, and the plants need a rest for one or two months, during which time we advise keeping them out of doors. The frost does not hurt the plants, as these Ferns are found on

the Fuji Mountain, where they are exposed to the frost the entire winter. If in a frozen condition, they should not be taken into a warm room immediately, but allowed to gradually thaw out. The second year they will quickly bring out new leaves of a greater perfection than the first year.

We beg to state we handle only the "Nagaha," or long-leaved variety, the common variety producing only short fronds. We deliver these plants from January to April.

5 inches . . . . .	\$125 per 1,000
7 to 9 inches . . . . .	\$200 per 1,000
